

Acid Stain Color Chart

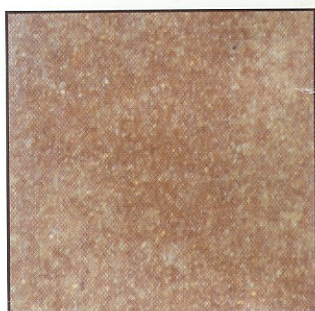

Bluestone

Turtleneck

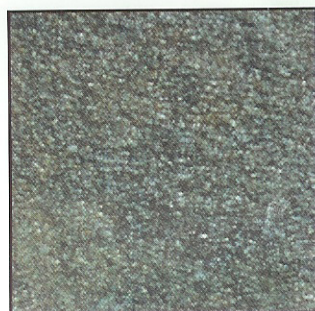

Rainforest

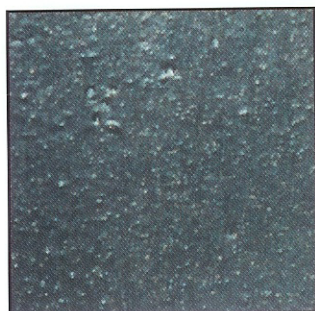

Tropicana

Wolverine

Medallion

Nightfall

Gibraltar

The above samples are merely an indication of the many colors possible when properly using Stardek Acid Stain. Results may vary as the effects of Stardek are unique to each concrete surface. Test samples should always be made before determining the final color. Many more combinations can be achieved by using Stardek Color Hardener. To obtain lighter colors, use a light color or white Color hardener.
